Subject: Mircosoft antitrust settlement

I am writing to voice my concern that the propose settlement of the antitrust against Mircosoft is grossly unfair. This company signed a previous agreement with the DOJ in the early 90's under the Clinton administration to refrain from continued monopolistic business practices. I believe that there is very if any proof that they were ever in compliance with.

Hence I do not see how this settlement will stop them in the future given the facetthat this settlement amounts to a slight TAP ON THE WRIST at best.
